## 1 Test instructions invoice and installment

Your webshop is now in test mode. This means that you, after you have finished the customizations of your online store, have to test to send in orders/make invoices.

In the e-mail you will find your personal login and url to the Svea Payments Admin.

**PLEASE NOTE!** Social security and organizational numbers regarding Invoice and instalments are only to be used in Sveas' test environment – and not for any other purposes in any other systems.

**PLEASE NOTE!** As companies in Sweden may have more than one address, we will return two addresses on our Swedish business test reply.

**PLEASE NOTE!** When testing instalments, the total row sum must be at least 500 kr.

When testing, use the following test person and organization numbers.

### 1.1 Test customers Sweden

#### 1.1.1 Sweden Individual

Result	Person/Orgnr	Name	Street	c/o	Zip code	City	Telephone
Approved	4605092222	Tess, T Persson	Testgatan 1	c/o Eriksson, Erik	99999	Stan	08 – 111 111 11

Limit	Gerwerbe sauber Auskunftsfähig	Bergstrasse	52062	Aachen	040-89803-211	27	DE456789012

### 1.7 Production mode Invoice and Installment

When your integration is working and you feel satisfied with testing, please contact your personal integrator alternatively contact us via email: support-webpay@svea.com. We will then look at the performed tests, and if approved, we will then put you in production mode.

All the information you could possibly need to start up is available at:

<https://www.svea.com/se/sv/foretag/betallosningar/tech-site/>

## 2 Testinstructions Card- and Direct bank

### 2.1 Test card number swedish acquiring agreement

The following information can be used if you want to test card purchases.

Card number for successful authorization	
4916-4232-3977-8102	Visa
5392-1273-3201-0533	MasterCard
Failed authorization	
To test denied payments change the payment amount to 1 in the end.	
<b>Example:</b>	
A payment with amount: 10000 will result in "Success"	
A payment with amount: 10001 will result in "Denied by bank".	

CVV/Control Numbers: any three-digit number.

Valid for: any date in the future

## 2.2 Testing Anti-Fraud for Swedish acquirers

If the merchant company is using our Anti-Fraud services, they must have an agreement for BIN control and / or IP control. When the service is activated in our system – go to “Anti-Fraud” in the store profile and add or remove the countries that you want to accept cards from, and/ or the countries from whom you want to accept the IP number from.

The following short codes can be used when testing BIN control:

US	4001160022223300
NO	4001920022223300
SE	4444333322223300

If you want to test our IP-based country restriction, you can test by only allowing incoming orders from Norway. (If you are located in a country other than Norway).

This feature means that you can configure the shop to only allow orders from certain countries based upon the customers IP-addresses.

## 2.3 Production mode Card- and Direct bank

When your connection is working and your test purchases are correct contact your personal integrator alternatively contact us via email: [support-webpay@sveaekonomi.se](mailto:support-webpay@sveaekonomi.se).

When all is settled with your acquirer / bank we will send you the URL link and the secret word to the production environment
