3 Test instructions WebPay Invoice, Account Credit and Installment

In this document you will find links and login information to WebPay's administration interface regarding Invoice/Installments. When you login you are placed in test mode. This means that you, after you are done with adjustments in your online store, can try sending in orders/invoices.

PLEASE NOTE! Social security and organizational numbers regarding Invoice and installments are only to be used in WebPay's test environment – and not for any other purposes in any other systems.

PLEASE NOTE! As Companies in Sweden may have more than one address, we will return two addresses on our Swedish business test reply.

PLEASE NOTE! When testing installments, the total row sum must be at least 500 kr.

5 Test instructions Card- and Direct bank

5.1 Login demo-account

Login to test environment

URL test environment	https://webpaypaymentgatewaytest.svea.com/webpay-admin/
Merchant ID	1200
User name	1200Test
Password	Demobutik1

NOTE! Please do not change the password!

Secret word:

27f18bfcbe4d7f39971cb3460fbe7234a82fb48f985cf22a068fa1a685fe7e6f93c7d0d92fee4e8fd7dc0c9f11e2507300e675220ee85679afa681407ee2416d

5.2 Test card number swedish acquiring agreement

The following information can be used if you want to test card purchases with Payment Method: SVEACARDPAY

Card number for successful authorization	
5392-1273-3201-0533	Visa
5392-1273-3201-0533	MasterCard
Failed authorization	
To test denied payments change the payment amount to 1 in the end. (minor currency)	
Example:	
A payment with amount: 10000 will result in "Success".	
A payment with amount: 10001 will result in "Denied by bank".	

CVV/Control Numbers: any three-digit number.

Valid for: any date in the future

5.3 Testing Anti-Fraud for Swedish acquirers

If the merchant company is using our anti-fraud services, they must have an agreement for BIN control and / or IP control. When the service is activated in our system – go to "Anti-Fraud" in the store profile and add or remove the countries that you want to accept cards from, and/ or the countries from whom you want to accept the IP number from.

The following short codes can be used when testing BIN control:

US	400116002223300
----	-----------------

NO	4001920022223300
SE	4444333322223300

If you want to test our IP-based country restriction, you can test by only allowing incoming orders from Norway. (If you are located in a country other than Norway).

This feature means that you can configure the shop to only allow orders from certain countries based upon the customers IP-addresses.

6 Documentation

All information you could possibly need to start up is available at: <http://webpay.svea.com/sv/swe/salja/tech-site/>
